

Patient Choice *Signature* Care System Listing for America's Care System

Plan Year 2004

This Care System listing contains information about the physicians, hospitals and other health care providers and facilities that are affiliated with America's Care System.

While we are committed to providing the most up-to-date information, changes do occur within a Care System that may not be reflected in this document.

Before receiving services, you should always verify that a provider participates in our network and continues to serve your selected Care System. You can do this by contacting the provider's office or by calling Customer Service at the phone number listed on your identification card.

Patient Choice Program Features

In the Patient Choice program, providers align themselves into networks called "Care Systems" that are arranged into low, medium and high cost tiers.

Each Care System includes physicians, clinics, hospitals and other health care providers who work together to serve you.

When you enroll in your employer's plan, you select the Care System that best meets your needs. Each covered family member may choose his or her own Care System.

Your Care System offers a wide range of covered services and is the key to you and your family members receiving in-network coverage. In addition, the amount you contribute toward the cost of your coverage may depend on the cost group your selected Care System falls into—less for the cost tier (\$) and more for higher cost tiers (\$\$) and (\$\$\$). (See your employer's enrollment material for more information.)

How to Use the Patient Choice Network

Obtaining Services

Eligible services you receive from providers that are listed as affiliated with your Care System will be covered beginning on the effective date of your coverage.

When you schedule an office visit, let the clinic know you are a Patient Choice participant. When you arrive for your appointment, show your identification card.

In- and Out-of-Network Services

Services furnished by the health care providers and facilities affiliated with your selected Care System are considered "in-network" services, with eligible expenses covered at the in-network level—the highest benefit level available through your employer's plan.

Services furnished by health care providers and facilities that are NOT affiliated with your selected Care System are considered "out-of-network," with eligible expenses covered at the out-of-network benefit level. Your out-of-pocket costs will be higher for out-of-network services.

Changing Your Care System Selection

If you want to obtain care at a clinic in a different Care System, you should contact Customer Service at the phone number listed on your identification card. If you obtain care from a clinic in a different Care System without first changing your Care System selection, your plan's out-of-network benefit provisions will apply.

You may change to a Care System in the same or lower-level cost tier as often as once a month. Generally, your employer's plan does not allow you to change to a Care System in a higher-level cost tier during the plan year.

About Our Services

Patient Choice does not provide health services or practice medicine, nor is it a health plan. Patient Choice arranges for providers of health services to participate in a network of Care Systems. Employers make the Patient Choice network available to their employees (and their family members) as part of the employer's health plan. Network providers are not employees of Patient Choice.

America's Care System

America'sPPO

connecting providers, patients, employers and payers

America's Care System understands that finding the right health care provider is important to you. That's why we provide access to a comprehensive network of primary care and specialist physicians who participate in America's PPO network.

You can directly access any type of care provider within our Care System, any time, whether it's a primary care doctor such as a family physician or pediatrician, or a specialist such as an allergist or dermatologist. America's Care System gives you freedom of choice.

Note: When you enroll in America's Care System, you do not need to designate a primary care clinic.

Service Area:

America's Care System serves individuals in select areas of rural Minnesota and throughout the Great Plains including Iowa, Nebraska, North Dakota and South Dakota.

Affiliated Hospital:

Our Care System determines the hospitals it prefers to use. To see the list of hospitals our Care System works with, please refer to the "Hospital" section in this directory.

Obtaining Care:

When you obtain care from a provider affiliated with your selected Care System, it is considered in-network. That means services covered under your employer's benefit plan, will be covered at the in-network level—the highest benefit level available through that plan.

Care is considered out-of-network if it is obtained from a provider who is not affiliated with your chosen Care System. Your out-of-pocket costs will be higher for out-of-network services. Depending on the benefit plan offered by your employer, out-of-network services may not be covered or may be covered at a reduced benefit level. Additional providers may be available based on the recommendation of your care provider.
